Company Profile

1. Company Overview

Inovi Solutions is a Texas-based minority-owned and women-owned business specializing in enterprise Salesforce solutions, artificial intelligence (AI), cloud ERP, data engineering, and enterprise systems integration. Founded in 2011 (subject to confirmation), Inovi helps organizations modernize business processes, connect disparate systems, automate workflows, and improve operational efficiency.

Inovi combines expertise in Salesforce implementation and development with AI-enabled applications, ERP solutions, data management, and enterprise integration. Its multidisciplinary team supports projects from requirements analysis and solution design through implementation, testing, deployment, and ongoing support.

2. Corporate Information

Information	Details
Year Established	2011
Legal Name	Inovi Solutions
Key Contact Person	Faiz Mannan
Role	Chief Technology Officer
Email	faiz@inovisolutions.com
Phone	(469) 815-4078
Headquarters	3412 Mark Twain Blvd., Flower Mound, TX 75022, USA
Website	inovisolutions.com
Ownership / Socioeconomic Status	Minority-Owned and Women-Owned Business – State of Texas Certified.

SAM.gov UEI	MK83YRZL1986
CAGE Code	84PQ3
GSA Schedule	47QTCA22D00BW
GSA Categories / SINs	518210C, 54151, 54151S, OLM
Contract / Payment Methods	Government Credit Cards and Purchase Cards
Salesforce Experience	Enterprise-scale Salesforce transformations
Client Satisfaction	98% CSAT
Salesforce AppExchange Rating	5-Star Rating

3. Salesforce Capabilities & Technical Expertise

Inovi provides consulting, solution architecture, implementation, development, integration, data migration, testing, deployment, and support across applicable Salesforce products and related enterprise technologies.

3.1 Technical & Professional Services

Capability Area	Key Services
Consulting & Architecture	Requirements analysis, business process assessment, solution design, technical architecture, and implementation planning
Salesforce Implementation & Development	Configuration, customization, Apex, Lightning Web Components (LWC), Salesforce Flow, custom applications, and platform enhancements
AI & Agentic Solutions	Salesforce Agentforce, Anthropic Claude integrations, large language model applications, intelligent assistants, and AI-enabled workflows

CRM & Customer Experience	Sales Cloud, Service Cloud, Experience Cloud, case management, customer portals, and CRM automation
Field Service & Workforce Operations	Field Service, scheduling, dispatching, work orders, service appointments, and mobile workforce management
CPQ & Revenue Processes	Salesforce CPQ, product configuration, pricing rules, quote generation, and approval workflows
ERP & Financial Applications	Accounting Seed, Rootstock, and Goldfinch-related solutions, financial workflows, ERP integration, and financial data migration
Enterprise Integration	MuleSoft, Dell Boomi, REST/SOAP APIs, EDI, middleware, legacy systems, databases, and third-party applications
Data Engineering & Analytics	Data migration, ETL pipelines, data mapping, reconciliation, data modeling, Tableau, CRM Analytics, and reporting
Marketing Automation	Marketing Cloud Engagement, Journey Builder, Data Extensions, automated communications, and campaign reporting
Cloud & Application Development	Cloud-based applications, backend services, databases, AWS, Azure, Google Cloud, and third-party integrations
Quality Assurance & Release Management	Functional and integration testing, UAT, defect management, deployment, release coordination, and production validation
Managed Services & Support	Administration, troubleshooting, maintenance, enhancements, optimization, and ongoing technical support

Project Management & Governance	Agile/Scrum, hybrid delivery, scope and schedule management, risk management, stakeholder coordination, and project reporting

3.2 Salesforce Product Portfolio

Inovi provides services across applicable Salesforce products and solutions, based on each engagement's requirements.

- **Core CRM & Platform:** Salesforce Platform, Sales Cloud, Service Cloud, Experience Cloud, Revenue Cloud, Salesforce CPQ, and Field Service.
- **AI, Data & Analytics:** Agentforce, Data Cloud/Data 360, Tableau, CRM Analytics, and AI-enabled applications.
- **Marketing & Commerce:** Marketing Cloud Engagement and Commerce Cloud.
- **Integration & Collaboration:** MuleSoft, Slack, Heroku, APIs, and third-party integration platforms such as Dell Boomi.
- **Industry Solutions:** Nonprofit, Education, Financial Services, Health, Manufacturing, Automotive, Communications, Consumer Goods, Energy & Utilities, Media, Life Sciences, Public Sector Solutions, and other applicable industry solutions.

Across applicable products, Inovi provides consulting, implementation, configuration, customization, development, integration, data migration, testing, deployment, optimization, training, managed services, maintenance, and ongoing support.

3.3 AI, ERP & Enterprise Integration

Inovi's AI capabilities include Salesforce Agentforce, agentic AI development, large language model integration, and AI-enabled business workflows. Depending on project requirements, solutions may incorporate Anthropic Claude, OpenAI models, Google Gemini, and related technologies.

For service operations, relevant capabilities include Service Cloud, Agentforce Voice, Field Service, and automated service workflows.

In ERP and financial applications, Inovi supports solutions involving **Accounting Seed, Rootstock, and Goldfinch**, including financial workflows, data migration, reporting, and system integration. Inovi identifies itself as an Accounting Seed Elite Partner; this designation should be confirmed against current partner documentation before submission.

For enterprise integration, Inovi uses technologies such as MuleSoft and Dell Boomi, along with APIs and custom integration components, to connect Salesforce with legacy systems, ERP platforms, databases, and third-party applications.

4. Highlighted Experience

Inovi's project experience includes Salesforce transformation, customer service, field operations, marketing automation, nonprofit services, financial operations, data migration, and enterprise integration. The following selected engagements are listed from most recent to oldest.

1. **2026–Present - Human Development Fund:** Accounting Seed implementation on Salesforce, Chart of Accounts configuration, financial data migration, Financial Report Hub, dashboards, financial reports, testing, and training.

2. **2026–Present - One Mission Society:** Accounting Seed data migration, data dictionary development, financial data mapping, Chart of Accounts alignment, transaction migration, and data validation.

3. **2025–2026 - AngioDynamics: Salesforce Marketing Cloud Implementation:** Marketing Cloud Engagement implementation, automated communications, data integration, Data Extensions, SQL Query Activities, Journey Builder, campaign reporting, testing, and post-launch support.

4. **2025 - Ranch Hands Rescue:** Salesforce Nonprofit Success Pack implementation and managed services, including case management, intake automation, duplicate checking, notifications, task assignment, caseload management, dashboards, and reporting.

5. **2025–Present - Keys Non Profit:** Accounting Seed implementation on Salesforce, financial data migration, workflow automation, access controls, approvals, inventory management, and financial reporting.

6. **2024–2025 - Meridian Cooperative:** Migration of 300+ users from Microsoft Dynamics to Salesforce Service Cloud and Experience Cloud, including Case Management, automation, chat, Omni-Channel, Slack, and Jira integrations.

7. **2023–Present - AngioDynamics: Salesforce Managed Services:** Salesforce support and enhancements across Sales Cloud, Service Cloud, Field Service, Experience Cloud, CRM Analytics, integrations, automation, access management, and release governance.

8. **2023–2025 - Loxo @ Lilly:** Salesforce Sales Cloud enhancements for clinical protocols, escalations, site-level information, workflow automation, external data integration, dashboards, reporting, and ongoing support.

9. **2023–2024 - RigUPATL:** Salesforce Field Service implementation to digitize field operations, improve scheduling and dispatching, and provide visibility into field activities.

10. **2023 - Nana Grants:** Salesforce and Experience Cloud enhancements supporting application forms, automated notifications, scholarship eligibility management, and waiting-list processes.

11. **2022 - Quality Care for Children:** Salesforce Nonprofit Success Pack implementation supporting program and family records, eligibility verification, scholarship management, workflow automation, reports, and dashboards.

12. **2018–Present - EPIC, National Disaster Response Company:** Multi-year Salesforce transformation for 100+ users using Field Service, Sales Cloud, and Service Cloud to replace manual processes with an integrated operational platform.

5. Key Personnel

Inovi's team includes professionals in project management, Salesforce architecture and development, AI solutions, ERP applications, enterprise integration, data engineering, and quality assurance. The following order reflects the preferred proposal staffing hierarchy. Proposed assignments and availability should be confirmed for each solicitation.

Name / Role	Total / Relevant Experience	Primary Areas / Skills
Ben Smith - Project Manager	25+ years of experience in Information Technology and 15+ years in project and program delivery	Project and program management, Agile/Scrum, hybrid delivery, governance, risk management, stakeholder coordination
Corey DeBoer - Salesforce Solutions Architect	20+ years in Salesforce; 14 years in dedicated Salesforce consulting, subject to résumé confirmation	Salesforce architecture, solution design, enterprise implementations, Service Cloud, Experience Cloud, data migration
Md. Arshad Hossain - Senior Director of Development	20+ years in software development; 12+ years in Salesforce	Enterprise architecture, Salesforce development, AI and agentic solutions, Claude, OpenAI, Gemini, technical leadership
Kishore Menta - Senior Salesforce Developer / DevOps Engineer	20+ years in specialized software experience	Salesforce development, Apex, LWC, API integration, CI/CD, MuleSoft, deployment
Sagar Chakraborty - Technical Lead	20+ years in software development; 10 years in Salesforce	Salesforce architecture, Apex, LWC, MuleSoft, Dell Boomi, REST/SOAP APIs, CI/CD
Sajjad Ahmed - Enterprise Architect /	10+ years in Salesforce and integration architecture, subject to résumé confirmation	MuleSoft, Dell Boomi, Salesforce architecture, Agentforce, Accounting Seed, Apex, LWC, REST APIs

Integration Specialist		
Md. Nazim Ul Islam - QA / Project Delivery Lead	15+ years in industry experience, Salesforce solutions, and project delivery, subject to résumé confirmation	Quality assurance, UAT, Salesforce implementations, Accounting Seed, Field Service, data migration, release management
Md. Tahzeeb Rasheed - Accounting Seed / Financial Systems Specialist	12+ years in finance and accounting, subject to confirmation	Accounting Seed-related financial solutions, financial reporting, financial modeling, process automation, budget management, financial analysis
Allen Irle - Salesforce Functional Consultant / Business Analyst	8+ years in Salesforce	Salesforce consulting, Field Service, Sales Cloud, Service Cloud, CPQ, Accounting Seed, business analysis
Mohim Ahmad - Senior Salesforce Developer / Technical Lead	8+ years in software development; 6+ years in Salesforce	Accounting Seed, Field Service, CPQ, Apex, LWC, Service Cloud, Agentforce, integrations
Md. Nafis Siddique - Senior Salesforce Developer / Technical Lead	7+ years in technology and software development	Apex, LWC, CPQ, Experience Cloud, Marketing Cloud, Accounting Seed, third-party integrations
Md. Razwanul Ghani - Senior Salesforce Developer	6+ years in software development; 3+ years in Salesforce, subject to résumé confirmation	MuleSoft, EDI, Marketing Cloud, API integration, QuickBooks, automation
Rowshanara Sadia - Salesforce Developer	4+ years in software development	Salesforce CPQ, Apex, LWC, Flow, Agentforce, pricing automation, API integration

Aumit Hasan - Data Engineer / Analyst	4+ years in data engineering and analytics	ETL pipelines, Python, SQL, PySpark, AWS, Azure, Google Cloud, data warehousing, machine learning, dashboards

6. Certifications & Qualifications

Inovi's team includes Salesforce-certified architects, developers, administrators, consultants, and technical specialists. Relevant qualifications should be selected for each proposal based on the actual requirements and verified against current credentials.

Qualification Area	Relevant Certifications / Expertise
Salesforce Architecture	Application Architect, Data Architecture & Management Designer, Sharing & Visibility Designer, Development Lifecycle & Deployment Designer
Salesforce Development	Platform Developer I and II, Platform App Builder, JavaScript Developer I
Salesforce Administration	Salesforce Administrator, Advanced Administrator, Platform Administrator II
Salesforce Cloud Consulting	Service Cloud Consultant, Sales Cloud Consultant, Experience Cloud Consultant, Field Service Consultant
AI & Agentforce	Agentforce Specialist and documented Salesforce AI credentials
Integration	MuleSoft certifications, integration architecture, REST/SOAP APIs, EDI, middleware
Data & Analytics	Tableau Data Analyst, data engineering, ETL, reporting, and data migration

Project Management	Professional Scrum Master I (PSM I), Agile/Scrum, Waterfall, hybrid delivery, and program governance
ERP & Financial Applications	Accounting Seed implementation, financial workflows, ERP integration, and financial data migration

7. Delivery, Quality & Governance

Inovi uses a structured delivery approach to manage requirements, technical execution, quality, and stakeholder expectations throughout the project lifecycle.

Delivery Area	Approach / Capability
Project Management	Scope, schedule, budget, resource planning, risk management, dependencies, and status reporting
Architecture & Design	Requirements analysis, solution design, data modeling, integration architecture, and technical standards.
Development & Integration	Configuration, custom code, APIs, middleware, ERP integration, and data migration
Quality Assurance	Test plans, functional and integration testing, UAT, defect tracking, validation, and issue resolution
Release & Deployment	Release planning, CI/CD practices, deployment coordination, production validation, and hypercare
Training & Adoption	User training, documentation, knowledge transfer, and adoption support
Ongoing Support	Maintenance, troubleshooting, enhancements, managed services, and performance improvement

8. Corporate Differentiators

Broad Technical Coverage: Inovi combines Salesforce, AI-enabled applications, ERP solutions, integration engineering, data services, and quality assurance within one technical delivery organization.

Experienced Technical Team: The team includes professionals with experience in enterprise architecture, Salesforce implementation, technical leadership, integration, data engineering, and project delivery.

AI & Enterprise Modernization: Inovi's documented team capabilities include Salesforce Agentforce, large language model integrations, and AI-enabled workflows, alongside legacy-system integration and cloud-based business applications.

Structured Delivery: A combination of project governance, technical design, testing, and release management supports controlled implementations and ongoing improvement.

Reported Client Satisfaction: Inovi reports a 98% CSAT score and a 5-star Salesforce AppExchange rating. Supporting evidence should be retained for proposals when requested.
